

Parking lot USB exercise

Contents	<i>Jorge USB drive contain the personally identified information like Family photos and Traveling info. Also there are sensitive work files like hire resume, schedule and employee budget. One should never store personal file with work file as if the hacker hack information she/he can miss use it.</i>
Attacker mindset	<i>The information like hire resume, schedule and employee budgets can be used against other employees as a social engineering. Also as the jorge's also store Family photos it's high chance that attackers use this information against relatives. And also chance that they find backdoor to access the business information</i>
Risk analysis	<i>Ransomware, spyware type of software could be hidden on these devices, If the device infected then attacker get the access to the device and she/he may</i>
